

Transcribe and Listen in Real Time

See accurate realtime transcriptions during depositions

Centrally manage transcripts and audio files

Reduce the cost of testimony with a simple flat fee

The Cloud Court Testimony Intelligence™ platform empowers litigators to prepare for, take and defend depositions more effectively. It enables users to extract hidden value from testimony and reduce the costs of litigation. Law firms and corporations alike enjoy unprecedented access to realtime testimony via live feeds, rough transcripts, and downloadable audio.

Advanced modules boost performance and set the stage for improved outcomes by providing a remote collaboration portal, patent-pending eDiscovery search tools, hyper-organized testimony intelligence, and predictive transcripts.

Reduce Testimony Costs

Reduce the cost of capturing testimony immediately. The Base module transcribes depositions in real time, whether remote or in-person. Counsel can view realtime transcription during the deposition, then download a rough transcript with the audio recording minutes after the deposition concludes.

For the non-noticing party, typically the rough transcript is sufficient for their litigation needs while avoiding costly fees for transcript copies, expediting fees, and other transcription “taxes.”

For the noticing party, realtime transcription enhances the taking attorney’s ability to review questions as they are asked as well as the answers given to ensure both are clear and have all the critical elements. A customizable dictionary enhances the accuracy of transcription.

Savings Example

A corporation is noticed for about 500 depositions every year. Its legal department spends between \$1,000 and \$2,000 per deposition transcript. Using the Base module, they will save 75% to 90% on their noticed transcript copies while giving the legal team more timely access to testimony at every turn. Not only do they get rough transcripts within minutes after the

**View and Stream Realtime Transcription**

Easily refer back to key testimony points, cite witnesses word for word, loop in remote colleagues

**Centrally Manage Transcripts and Audio**

Quickly find and share stored files for each case, download audio and rough transcripts anytime

**Accelerate Delivery, Reduce Cost**

Get the rough transcript minutes after the depo, decide later if you need to order a finalized transcript

Testimony Intelligence Base Module

The screenshot displays the Cloud Court interface. At the top, the logo 'CLOUDCOURT' is on the left, and the user 'Milena B Higgins' is on the right. Below the header, the case information 'Case Number: 001' and 'Case Name: Rantix vs Rapterz' is shown. The main content area features a 'Realtime Transcript' player with a play button, 'Elapsed Time 00: 05: 24', and a red 'End Deposition' button. The transcript text reads: 'Good afternoon . Ma'am . Uh , my name is John Simmons and I serve as counsel for the plaintiff in this case . Rapterz Inc . . Would you state your name for the record , please ? My name is Rachell . Durochet . And what do you do for a living Ms. Durochet . I serve as the chief technology officer at Rantix Drones , Inc . Thank you . Uh , do you have an understanding of what this case is about ? Yes . I'm told this is a patent case and that essentially the company you represent has sued Rantix Drones for alleged infringement of a number of patents . There may be other issues , but I'm not aware of them . Ms. Durochet . How long have you served as the chief technology officer for Rantix Drones ? I'd say for the last four years or so . I was previously the head of product development at Rantix for two years before being promoted to the CTO position . As CTO are you involved in what some companies call competitive intelligence ? If you mean reviewing competitors products , then the answer is no , not personally involved . Though , some of my direct reports are involved in that . Um , when you say you're not involved in . Competitor's products . Do you mean that you're not personally involved in reviewing those products ? Well , like any company , we want to understand what our competition is doing . And so we regularly review those products , but I'm not closely involved with that . It's handled by our engineering staff . And the engineering staff reports to you .'

depo, but they also enjoy realtime transcription, audio feed, and audio download. They no longer pay token fees for streaming audio or for colleagues to observe the transcription.

Master the Testimony Lifecycle

The Base module helps you reduce testimony costs and drive faster resolutions. Record mock depositions to better prepare witnesses before they testify. Witnesses can reference transcripts to recall points raised by counsel. See the transcription as it happens live. Access a transcript right after a deposition and circulate it to your team.

- Upload case-specific dictionaries to enhance transcription accuracy
- Download audio after the deposition (useful for settlement negotiations)
- Manage audio and transcripts centrally, per case, along with digital exhibits
- Order a finalized transcript from a court reporter or just use the rough transcript

About Cloud Court

Cloud Court, Inc. is a LegalTech company formed by litigation professionals. Our mission is to leverage modern technology to help litigation teams reach their legal goals faster. We help our clients win difficult cases as well as cases that could go either way. We also help our clients win the cases that they should win, only earlier and on better terms. Our primary focus is testimony, with a strong emphasis on deposition testimony. Visit cloudcourtinc.com.

Collaborate with Remote Colleagues

Add the Collaboration module to privately chat and send attachments to the attorney in the deposition. Invite colleagues to participate remotely and send live messages without alerting the opposition. Defend your witnesses and take down your adversaries. Ask us about the Collaboration module.
