# Change the Transcription Game

DEPO

See accurate realtime transcriptions during a deposition or meeting

Centrally manage audio, transcripts and exhibits

Avoid the high cost of court reporters with a flat fee

Depo is an AI-driven application that combines realtime transcription and file management for your depositions and examinations under oath. It enables litigators and other users to avoid the high cost of court reporters while accurately capturing testimony or interviews via audio and speech-to-text transcription.

Depo uses the most accurate speech-to-text technology on the market to capture speech in real time. This speech recognition is the product of advanced neural network models and millions of hours of training data.

- In pause mode, you may conclude the depositon or resume it.

GO OFF THE RECORD

View Realtime Transcription During Depositions
Prep and defend your witnesses or take down opposing witnesses

Centrally Manage Audio, Transcripts, and Exhibits
Quickly find and share stored files for each case

Accelerate Delivery, Reduce Cost
Get rough transcripts in minutes or final transcripts in 5 days

DEPO

Depo slashes the cost of the transcription process further by letting users decide whether they want a transcript for a given deposition or examination. Full proofreading is available for an additional low cost.

How It Works

Questions and witness testimony are captured via microphone. Depo instantly converts audio into text and displays the realtime transcript to all participants.

After the deposition or meeting, download the rough transcript within minutes. Choose to use the rough transcript or request a final version delivered in five days.

Users can centrally manage recordings and transcripts by case, along with digital exhibits. For a flat fee, they can record and automatically transcribe virtually unlimited depositions and obtain highly accurate (95% or better) rough transcripts within hours.

Master the Deposition Lifecycle

Leverage Depo in all phases of the deposition lifecycle to drive better and faster resolutions. Record mock depos and download rough transcripts to better prepare witnesses and reduce their stress before they testify. Witnesses can reference transcripts to recall points raised by counsel. See the transcription as it happens live. Access a transcript right after a deposition and circulate it to your team.

- Avoid the high cost of court reporters and get highly accurate transcripts (e.g. 95% accurate) within 24 hours for a flat fee, regardless of length
- View real-time transcription on your laptop during the deposition and capture audio of the deposition (useful for settlement negotiations)
- Upload case-specific dictionaries to enhance transcription accuracy
- Manage audio and transcripts centrally, per case, along with digital exhibits
- Order final, human-reviewed transcripts within 5 days for an incremental fee

About Cloud Court, Inc

Cloud Court is a LegalTech company formed by litigation professionals. Our mission is to leverage modern technology to help litigation teams reach their legal goals faster. We help our clients win difficult cases as well as cases that could go either way. We also help our clients win the cases that they should win, only earlier and on better terms. Our primary focus is testimony, with a strong emphasis on deposition testimony. Learn more at cloudcourtinc.com

" In today's era of volatility, there is no other way but to re-invent. The only sustainable advantage you can have over others is agility, that's it. "
